No minimum order per customer required	✓	✓	✓	✓

## Email Attachment Filtering

Why Inspect Email Attachments On Your Internal Network When You Can Run Email Attachment Filtering In The Cloud With Proofpoint?

## Instant Replay

The Instant Replay feature allows users to send (or resend) an email from proofpoint to their messaging server.

## MLX Anti-Spam Filter

If your organizations' current email security solution doesn't provide a high level of anti-spam filter protection, contact Proofpoint for a free 30-day spam audit.

## Sandboxing

The term 'Sandboxing' or 'sandbox service' is used daily in IT Security and can be best explained as a process. A process where the creation of an isolated test environment is required (sandbox) where it is possible and safe to execute/run a suspicious file or URL.

## Anti-Phishing Protection

Anti-Phishing 'Cloud Security Service' – Scan All Incoming Email Embedded URL's Against The Worlds Largest Threat Database.

## Bayesian filtering

Bayesian Filtering And Messaging Fingerprinting Moving Into Genomic Sequence Analysis. The Difference Between Tier 1 And The 'Affordable' Solutions.

## Targeted Attack Protection – (TAP)

Protect your business against advanced threats in email with malicious attachments and URLs – even zero-day, polymorphic malware, weaponized documents, and credential phish.

## Machine Learning Technology

Proofpoint provides machine learning technology through pioneering research, with a highly configurable message-processing platform that provides a comprehensive defense against spam, viruses, and other messaging threats.

## CEO Fraud & Anti-Spoof Detection

Proofpoint has the detection and protection required for organisations to protect themselves from the ever increasing threat of CEO fraud using anti-spoofing features.
