MDaemon Overview

THOBSON Technologies™

MDaemon Technologies Inc

MDaemon Technologies develops email and email security software for the global SMB market. Founded in 1996, its products are trusted by small-to-medium businesses in over 90 countries and 25 languages.

MDaemon Private Email Server

MDaemon Messaging Server is a comprehensive messaging and collaboration solution providing secure, standards-compliant features for small-to-medium-sized businesses. It supports mailing lists, remote access and administration, spam-blocking,   content filtering, mobile email, and multiple domain support. It uses all current email authentication techniques to minimize email fraud and security threats. The MDaemon Messaging Server delivers full email server functionality, installs in minutes, and requires minimal support and administration.

AntiVirus for MDaemon

MDaemon Antivirus provides the next generation of antivirus and spam protection for the MDaemon Messaging Server by halting viruses on all inbound and outbound email at the server before it's passed on to client PCs, providing real-time spam, Recurrent Pattern Detection Technology (RPD)™, Zero-Hour™ Virus Outbreak Protection, Inline Virus Scanning via Kaspersky and ClamAV AntiVirus Engines, Urgent Update Notification, and more. It is the number one solution for safeguarding your MDaemon mail server.

Outlook Connector for MDaemon

Outlook Connector for the MDaemon opens up the groupware collaboration functions of Microsoft Outlook® by using MDaemon as the email server. With Outlook Connector you can stay in touch with employees, co-workers, customers, and vendors by sharing these Outlook features.
ActiveSync for MDaemon

MDaemon Messaging Server now includes support for Microsoft's ActiveSync, which is a separately licensed over-the-air (OTA) ActiveSync (AirSync) server. ActiveSync provides synchronization of a user's default and shared email, calendar, and contact data between their MDaemon / WorldClient account and an ActiveSync capable device.

MailStore Server

No matter whether you want to meet compliance requirements, protect yourself from data loss, or solve technical problems, MailStore Server provides you with a high-performance, intuitive solution that you can install and test for free in just a few minutes.

MDaemon Private Email Server

MDaemon Messaging Server is a comprehensive messaging and collaboration solution providing secure, standards-compliant features for small-to-medium-sized businesses. It supports mailing lists, remote access and administration, spam-blocking, content filtering, mobile email, and multiple domain support. It uses all current email authentication techniques to minimize email fraud and security threats. The MDaemon Messaging Server delivers full email server functionality, installs in minutes, and requires minimal support and administration.

Mail Server
MDaemon supports IMAP, SMTP, and POP3 protocols and delivers solid performance from its feature-rich and user-friendly design.

Exchange Migration
Moving from one email server to another typically poses a significant challenge but MDaemon makes it simple.

WorldClient Instant Messenger
WorldClient Instant Messenger is a Closed Instant Messaging desktop client (app), included free with MDaemon

WorldClient Instant Messenger
MDaemon's WorldClient (Web-Based Email) is easy to use and offers all of the features needed by small-to-medium business customers.

MDaemon Remote Administration
MDaemon includes a convenient Remote Administration tool that provides administrators full access to all of MDaemon's features

Email Archiving
MDaemon's integrated email message archiving capabilities make it easy to safeguard your email messages to address regulatory

Affordable and Flexible On-Premises Email Solution to Build and Grow Your Business

The MDaemon Messaging Server is trusted by customers in over 90 countries around the world to meet the needs of their small- to medium-sized businesses. MDaemon is a reliable and secure mail server that does not require expensive administration or impose high per-user costs. It simplifies messaging and collaboration requirements with an intuitive, user-friendly design offering enterprise-class features that can be managed with minimal training and support.

▸ Hijacked Account Detection to prevent spammers from using your email and potentially getting your domain blacklisted
▸ Mobile Device Management to implement password policies or wipe devices when lost or stolen .
▸ Customizable Mail List Engine to manage bulletins, discussion groups and distribution lists.
▸ Powerful Spam Filter analyzes messages to increase spam recognition over time and improve inbox cleanliness
▸ Access to world class knowledgeable staff.
▸ Multiple language WorldClient (Web-Based Email) with integrated Business Instant Messaging.
▸ SSL and TLS Support for optimal message security
▸ Flexible Content Filter for customized server behavior of incoming and outgoing messages.
▸ Backscatter Protection prevents the receipt of unwanted messages due to a forged email return path.

AntiVirus for MDaemon

MDaemon AntiVirus provides the next generation of antivirus and spam protection for the MDaemon Messaging Server by halting viruses on all inbound and outbound email at the server before it's passed on to client PCs, providing real-time spam, Recurrent Pattern Detection Technology (RPD)™, Zero-Hour™ Virus Outbreak Protection, Inline Virus Scanning via Kaspersky and ClamAV AntiVirus Engines, Urgent Update Notification, and more. It is the number one solution for safeguarding your MDaemon mail

Recurrent Pattern Detection (RPD™) Technology

Recurrent Pattern Detection (RPD) uses patented technology to identify patterns which are content agnostic to safeguard the original message. These patterns cannot be used to reconstruct the original message.

RPD extracts and then analyzes relevant patterns, which are used to identify massive email-borne outbreaks. It classifies both distribution and structural patterns within an email message.

RPD patterns are compared to the local cache which provides fast match results for more than 70% of the patterns. If a pattern is not in the local cache, RPD will query global data centers for a match to provide true real-time protection

RPD is designed to distinguish between the distribution patterns of solicited bulk emails, representing legitimate business correspondence, from those of unsolicited bulk emails, representing spam.

RPD identifies incoming threat messages with very few, if any false positives. Not only are the patterns content agnostic, they are also language-independent making it equally effective for all message formats and encoding types.

Zero-Hour Virus Outbreak Protection
Real-time pattern analysis provides much faster protection than traditional filter and signature based solutions that require detecting, defining, and disseminating new virus information

Kaspersky AntiVirus Engine
SecurityPlus scans messages inline, using the Kaspersky AntiVirus Engine, during each SMTP session, effectively stopping malicious software at the email entrance to your network

ClamAV AntiVirus Engine
In addition to the Kaspersky AntiVirus engine, messages are scanned via the ClamAV plugin for SecurityPlus, adding an additional layer of antivirus protection for all inbound and outbound email traffic

Urgent Update Notification
Provides additional antivirus definitions beyond regularly scheduled updates. When a high-risk virus threat is identified by Kaspersky Labs, you can select to be notified and trigger

Versatile Control
SecurityPlus for MDaemon detects infected attachments in both plain text and HTML messages. When an infected attachment is detected and you have selected to not block

Log Files
SecurityPlus for MDaemon includes an administrative log that keeps track of the type, time, and location of detected viruses.

Outlook Connector for MDaemon

Outlook Connector for the MDaemon opens up the groupware collaboration functions of Microsoft Outlook® by using MDaemon as the email server. With Outlook Connector you can stay in touch with employees, co-workers, customers, and vendors by sharing these Outlook features.

‣ Outlook Collaboration
‣ Maintain Outlook Features
‣ Out-of-Office and Mail Forwarding Assistant
‣ Easy Maintenance

‣ Outlook Collaboration
‣ Maintain Outlook Features
‣ Out-of-Office and Mail Forwarding Assistant
‣ Easy Maintenance

‣ Outlook Collaboration
‣ Maintain Outlook Features
‣ Out-of-Office and Mail Forwarding Assistant
‣ Easy Maintenance

Outlook Features

Share Outlook messages, calendars, contacts, distribution lists, notes, tasks, and more using MDaemon as the mail server. Outbreak Protection requires no heuristic rules, content filtering, or signature updates.

Maintain Outlook Features

Outlook Connector works with popular Outlook features, including message grouping and search folders.

Enterprise Class Collaboration for Small- and Medium-Sized Businesses

WorldClient Instant Messenger is a Closed Instant Messaging desktop client (app), included free with MDaemon

Easy Maintenance

Detailed configuration options provide fine-tuning controls for experienced users and IT professionals

Out-of-Office and Mail Forwarding Assistant

Outlook Connector's Out-of-Office Assistant makes it easy to create and enable vacation messages or auto-responders.

Apply Sharing Permissions

Options for sharing vary from only showing the availability of the information to allowing complete control to add, change and delete.

Mark Messages as Spam/Non-Spam

Use the thumbs-up and thumbs-down buttons to flag messages as spam or non-spam.

Advanced Settings

Outlook Connector's advanced settings include SSL, TLS, and SMTP Authentication settings for secure email communications.

Small Business Licensing and Pricing

pricing designed for flexibility and affordability. Outlook Connector for MDaemon includes one year of Software License Renewal.

ActiveSync for MDaemon

MDaemon Messaging Server now includes support for Microsoft's ActiveSync, which is a separately licensed over-the-air (OTA) ActiveSync (AirSync) server. ActiveSync provides synchronization of a user's default and shared email, calendar, and contact data between their MDaemon / WorldClient account and an ActiveSync capable device.

- ‣ Protection from External Threats
- ‣ Administrator Options

- ‣ Protection from Internal Threats
- ‣ Performance Features

- ‣ Detailed Logs and Comprehensive Reports

Multiple Devices under One Account

Many people commonly have more than one mobile device. With ActiveSync for MDaemon, any user can have multiple devices of any make/model on a single account, making it easy to sync all your MDaemon email, calendar, contacts, tasks, and notes

Push Email

ActiveSync for MDaemon uses Push email technology that provides an always-on capability, in which new email is actively transferred (pushed) to the device after it is received by the MDaemon mail server.

Public and Shared Folder Access

Supported in MDaemon Pro with ActiveSync. While MDaemon's ActiveSync implementation supports Email, Events, Contacts, Tasks and Notes, not all device clients are capable of handling this data. Public and Shared folder access can be controlled at the user, domain and server levels.

Sessions Window

The ActiveSync Sessions tab in MDaemon's main interface displays activity for all devices or mail clients that are currently connected to MDaemon via ActiveSync, including session ID, connecting IP, domain, account, and device type.

Remote Wipe and Soft Wipe

If a device is lost or stolen, the MDaemon administrator can use the Wipe command to erase all data on the device and restore the device to its factory default state.

ActiveSync Options

ActiveSync Options can be configured for optimal performance for your specific environment. When troubleshooting ActiveSync issues, the log level can be set to "Debug logging" so that more detailed information is written to the ActiveSync log.

Autodiscovery

Autodiscover (or Auto Detect) Service: A user can easily create an account on their mobile device by entering their email and password. They do not need to know their server name to setup the email service.

Multiple Folder Synchronization

ActiveSync bundles all sync requests together instead of doing a sync for each folder separately, so battery life and data won't be consumed constantly and there's far lower message delivery latency.

Global Address Lookup

Global Address List (GAL), also known as Global Address Book, contains contact info and other resources associated with a contact to enable your MDaemon users to look up your other MDaemon users' contact info.

MailStore for MDaemon

No matter whether you want to meet compliance requirements, protect yourself from data loss, or solve technical problems, MailStore Server provides you with a high-performance, intuitive solution that you can install and test for free in just a few minutes.

‣ Flexible Archiving
‣ Reliable Compliance Features

‣ Scalable Storage Technology
‣ Fast Access for All Users

‣ Powerful Export Features

Flexible Archiving

MailStore Server supports most standard email servers, Internet mailboxes, email clients and file formats.

Reliable Compliance Features

A comprehensive technology concept ensures that companies using MailStore Server are able to comply with regulatory or business

Scalable Storage Technology

At the core of MailStore Server is a highly sophisticated storage technology that does not require an external database management system and is available immediately after setup is complete.

Fast Access for All Users

When accessing the archive, users can perform a full-text search (including all file attachments) or use the regular folder structure.

Powerful Export Features

MailStore Server is not a one-way street. Every email can be restored from the archive at any time by using standard file formats.

MailStore IMAP Server

Integration of the archive as a read-only mailbox into any email program or onto a mobile device via an integrated IMAP server
